

MEETING PREPARATION · ZAAANSTRAAT 314

Questions for Edwin

VvE Saenveste · Mortgage · Monument · Renovation · Due Diligence

Property: Zaanstraat 314, Amsterdam

Purchase price: €630,100 · **Mortgage:** €600,000 · **VvE:** ~€385/month

Prepared by: Belen & Filippo

PRIORITY QUESTIONS IF TIME IS LIMITED

1. Can we obtain a written statement from Pro VVE Beheer confirming the estimated financial impact of the sustainability project on apartment 314 specifically?
2. Has any special assessment or collective loan already been approved by the VvE?
3. What is the expected increase in monthly VvE contributions over the next 3 to 5 years?
4. Will the bank consider a future VvE collective loan or only the current monthly contribution?
5. What is the monthly mortgage impact of a bouwdepot of €15,000, €25,000 and €35,000?
6. Are there any monument or VvE restrictions on creating a second office with an acoustic plasterboard wall?
7. Can completion be planned around our rental notice period, potentially around 3 months from now?
8. What are the three biggest risks of this purchase from your perspective?
9. If this were your own purchase, what would you investigate further before signing?
10. Are you comfortable advising us to proceed if the technical inspection is satisfactory and no approved extraordinary VvE contribution exists?

1. TIMELINE & MOVE-IN

1. Based on the current transaction timeline, what is the earliest realistic completion date?
2. What is the latest realistic completion date if all normal procedures are followed?
3. Would it be feasible to schedule completion approximately 3 months from now to accommodate notice periods on our current rental agreement?
4. Are there any risks that could significantly delay completion beyond the expected timeline?
5. At what point would we have enough certainty to safely terminate our current lease?
6. If we keep temporary access to a current rental room during the first works, would that create any issue for the mortgage, insurance or registration timeline?

2. VVE SUSTAINABILITY PROJECT & FINANCIAL EXPOSURE

7. Can we obtain a written statement from Pro VVE Beheer confirming the estimated financial impact of the sustainability project on apartment Zaanstraat 314 specifically?
8. Is the €2.66 million sustainability budget still the current working estimate, or has it already been revised?
9. Has any special assessment (bijzondere bijdrage) already been approved by the VvE, even if it has not yet been invoiced?
10. Has the VvE already applied for a collective loan such as Warmtefonds or any other financing facility, or is financing still under discussion?
11. If a collective loan is approved after completion of the purchase, how would this affect us as new owners?
12. Based on the current VvE planning, what is the expected increase in monthly VvE contributions over the next 3 to 5 years?
13. Are there any upcoming VvE projects not yet reflected in the MJOP or current budget that could lead to additional costs?
14. Can we ask Pro VVE Beheer to confirm whether there are any outstanding debts, unpaid contributions or future approved obligations attached specifically to apartment 314?
15. Are the planned works mainly preventive maintenance, sustainability improvement, mandatory replacement, or a mix of all three?

3. MORTGAGE, FINANCING & BOUWDEPOT

16. Will the bank take into account a future VvE collective loan, or only the current monthly contribution of approximately €385?
17. Could a future VvE loan reduce our borrowing capacity or affect refinancing options later?
18. Is there any reason why the sustainability project, monument status, or VvE structure could negatively affect the mortgage approval process?
19. Are all VvE documents, financial statements, meeting minutes and sustainability plans being provided to the valuer (taxateur)?
20. Could you estimate the monthly mortgage impact of including a bouwdepot of approximately €15,000, €25,000 and €35,000 respectively?
21. Which renovation works would normally be accepted by the bank under a bouwdepot for this apartment?
22. Would flooring, kitchen replacement, painting, and an interior acoustic partition wall be eligible for bouwdepot financing?
23. How long would we have to use the bouwdepot funds?
24. What happens if part of the bouwdepot remains unused?
25. Would the bouwdepot affect the final mortgage interest rate or the approval timeline?

4. PURCHASE CONTRACT PROTECTION

26. Is there any contractual protection we can request if a significant VvE financial obligation becomes known before completion?
27. Can we verify whether the seller remains responsible for any VvE decisions approved before transfer, even if invoices are issued afterward?
28. Can we obtain confirmation from the notary that there are no outstanding debts attached to the apartment itself?
29. The sale conditions mention future VvE sustainability measures, major maintenance and possible window replacement. Does this clause fully shift those future costs to us as buyers?
30. Is there any way to make the contract more precise regarding already approved costs versus future possible costs?
31. Should we request any additional written confirmation from the selling agent, seller, VvE manager or notary before signing?

5. MONUMENT STATUS & FUTURE RENOVATIONS

32. Are the planned replacement windows and sustainability measures already approved from a monument and permit perspective, or are approvals still pending?
33. Is there a risk that monument requirements could materially increase project costs beyond the current estimates?
34. Are any subsidies already secured, or are they still assumptions within the financial model?
35. Are there any restrictions on installing an insulated plasterboard partition wall using metal studs, acoustic insulation and double plasterboard?
36. Would creating a second office inside the living room require any VvE approval?
37. Are non-structural internal partitions generally unrestricted in this monument designation?
38. Would replacing the current kitchen require any permits or approvals?
39. Are there any restrictions on future bathroom reconfiguration if no structural walls are modified?
40. Are there any limitations regarding drilling into walls or ceilings for built-in storage, curtain rails, lighting or shelving?
41. Are there any internal elements of this apartment that may be protected because of the monument status?

6. GROUND LEASE (ERFPACHT)

42. Can you confirm that the ground lease has been fully prepaid until 31 December 2059 and that there are no hidden annual ground lease obligations?
43. Has the apartment already been converted to perpetual leasehold (eeuwigdurende erfpacht), or will this need to be addressed in the future?
44. If it has not been converted, should we investigate conversion now or is it reasonable to leave this for later?
45. Could the erfpacht status affect the valuation, mortgage conditions or future resale value?

7. TECHNICAL & BUILDING CONDITION

- 46. Have you seen any evidence of structural issues, foundation concerns, settlement, roof defects or water intrusion affecting this building?
- 47. Has the VvE ever commissioned a foundation investigation, and if so, can we obtain a copy?
- 48. Are there any known disputes, insurance claims or legal proceedings involving the VvE?
- 49. Given that the apartment is on the top floor, are there any known roof-related maintenance issues or planned roof investments?
- 50. Has apartment 314 ever undergone major renovations?
- 51. Are there any known issues specific to this apartment not reflected in the inspection report?
- 52. Have previous owners or tenants raised concerns regarding noise, insulation, moisture, ventilation or temperature control?
- 53. Has the roof area directly above apartment 314 been inspected recently?
- 54. Do the technical inspection results give any reason to renegotiate, delay signing or request further investigation?

8. FUTURE RENOVATION FLEXIBILITY

- 55. If we decide to relocate the washing machine to the upstairs toilet area, are there any technical or legal restrictions we should be aware of?
- 56. Would moving the toilet into the larger bathroom be considered a standard renovation or would it require additional approvals?
- 57. Are there any known plumbing constraints affecting future bathroom redesign options?
- 58. Would adding a bidet or bidet-style toilet solution create any technical complication in this type of apartment?
- 59. Would future bathroom renovation works require VvE approval if they do not affect common pipes or structural elements?
- 60. Are there any ventilation constraints we should check before planning a future laundry closet?

9. INSURANCE, LIABILITY & PRACTICAL RISK

- 61. Are there any specific insurance considerations because the building is a Rijksmonument?
- 62. Would internal renovation works require notifying the insurer or the VvE?
- 63. If we install a new floor, do we need to provide acoustic certification to the VvE?
- 64. Are there specific VvE rules about flooring, underlay or impact sound reduction?
- 65. If we create a new internal office, would that affect the official number of rooms or the valuation?

10. FINAL DUE DILIGENCE

66. Based on everything you have reviewed, what would you consider the three biggest risks of purchasing Zaanstraat 314 today?
67. If this were your own purchase, is there any additional information you would insist on obtaining before signing the final deed?
68. Is there anything about this apartment, the VvE, the sustainability project, the monument status, or the building itself that a prudent buyer should specifically investigate further before signing?
69. Is there any point in the documents that looks normal at first glance but could become financially relevant later?
70. Would you personally be comfortable proceeding with this purchase if the technical inspection is satisfactory and the VvE confirms no approved extraordinary contribution?
